Re: Altamahow Mall, Altamahow Road, Burlington, Alamance County

Dear Mr. Williams:

This is our response to 40 CFR 280.62 Initial Abatement Measure and Site Check:

1. Prior to removal of the UST system all regulated substances were determined to have been removed or were at that time.
2. No evidence of aboveground releases were noted.
3. We found no evidence of vapors or free product to create an additional fire or safety hazard.
4. Contaminated soils were placed on plastic and covered with plastic.
5. Presence of a release noted by a closure site assessment.
6. No free product noted at the site by backhoe digging in the UST pit area.

Mr. Williams, Midway Oil and Gas Company, Inc., returned to the site to do further excavation, after receiving our notification of Federal Response Requirements. At that time the crew concentrated their digging where the failed soil was taken. They felt they have now completed the clean up and have taken five (5) soil samples (one (1) from each corner and one (1) from the bottom of the pit). They are at the lab being analysed now. When this has been completed we will be forwarding a follow-up report.

Sincerely,

*Wesley C. Mehring*
